### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by McCoy  
(5,009,467).

McCoy discloses an adjustable armrest for a chair comprising a U-shaped member 29/30 having a central section and a pair of ends 28. Each end has apertures 38 and 39 extending there through allowing the fasteners 41 to rotate or pivot. A guide plate 32 is coupled to the central section and has a mounting section including a pair of guide slots 35 that are perpendicular to the U-shaped member. The guide plate is fixedly coupled to the U-shaped member via fasteners 36 and 37. McCoy also discloses a back support bar 19 having first and second ends. The first end of the support bar is coupled to the chair, specifically the backrest 18 and the second end of the support bar 19 is coupled to the guide plate and guide slots. As seen in Figure 1, the support bar is coupled to the inner guide slots between the fasteners 36 and 37.

### ***Response to Arguments***

2. Applicant's arguments filed 13 August 2004 have been fully considered but they are not persuasive.

Art Unit: 3636

Applicant's primary argument is based upon the opinion that McCoy does not include the limitation of a U-shaped member with a pivot point in each end. However, as stated in the above rejection, McCoy teaches of a U-shaped member 29/30 wherein each end of the U-shaped member 29/30 includes apertures 38 and 39 extending there through and allowing fasteners 41 to rotate or pivot. Member 29 and member 30 form a U-shaped bracket. Moreover, it has also been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art.

*Howard v. Detroit Stove Works, 150 U.S. 164 (1893).*

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
